SUMMARY

Full stack developer with seven years on Angular, React and Node. I work across the whole thing: database schemas, APIs, and the screens that sit on top of them. Most of it has been SaaS platforms, internal tools and design systems for teams in the United States, Germany and the Gulf, taken on directly or through Toptal, where I passed the screening into the top 3 percent of applicants. The part I get asked back for is turning a Figma file into components the rest of the team builds from.

EXPERIENCE

Aspire

Jul 2022 to Present

Senior Full Stack Developer | Amman, Jordan

Three periods: Jul 2022 to Oct 2023, Nov 2023 to Mar 2025, and Feb 2026 to present. Product work for the agency's clients, embedded in their teams.

WeightWatchers

Built and maintained the internal admin platform, giving the teams behind the product the controls and features they promote to end users.

React, Node.js, PostgreSQL, Prisma, TypeScript

Glassdoor

Built the design system the whole platform runs on, turning Figma into components other developers build from, plus the email templates that reach its users.

React, Storybook, TypeScript, Sass, Figma

Subject7

Migrated a large legacy Java product into React and Next, carrying its logic across intact, and contributed to the Spring Boot backend behind it.

React, Next.js, TypeScript, Spring Boot

Tabya

Mar 2025 to Feb 2026

Senior Full Stack Developer | Amman, Jordan, for the German market

- Built the internal and external products for German customers and staff: the database schemas, the APIs, and the pages that sit on top of them.

Angular, Node.js, TypeScript, Prisma, GraphQL, PostgreSQL, Ionic

Toptal

Oct 2022 to Present

Senior Frontend Developer, freelance | Remote

Accepted into the top 3 percent of applicants and matched to client engagements.

Suzy

Oct 2022 to Oct 2024

Built internal and external products, and the design system that later carried across several of them.

Angular, RxJS, Storybook, TypeScript, Figma

Pitchlane

Feb 2025 to Apr 2025

Part time. Shipped features on the customer-facing product, turned Figma into working screens, and helped decide the logic in grooming.

Vue, TypeScript, Node.js, Sass

Ejaz

Oct 2023 to Feb 2024

Frontend Developer | Amman, Jordan

Full time to Nov 2023, part time after that.

- Built the chat system and the meeting-summary interface, and the logic under both, for the first MVP.

React, Tailwind, Node.js, TypeScript

Gate Tech

Mar 2021 to Sep 2023

Frontend Developer, part time | Amman, Jordan

- Built a software asset management platform in Angular, from the first screens through to the features it shipped on.
- Gave it a design system and a UI kit: generic components reusable across the whole application, so the team stopped rebuilding the same controls per screen.

Angular, Angular Material, TypeScript, Sass

Appswave

Jun 2021 to Jul 2022

Frontend Engineer | Amman, Jordan

- Designed and built sites for government clients across the Gulf, and contributed to the design decisions behind them.
- Worked with those clients on site to settle what they actually needed before it was built.

React, Liferay, Node.js, TypeScript, jQuery

Technology Arc

Oct 2019 to Jan 2022

Frontend Developer, part time | Amman, Jordan

- Built the MVP for a planned eCommerce marketplace for SaaS products, designed its mockups, and gave it a small design system to reuse across the app.

Angular, RxJS, Node.js, TypeScript, Sass

Madain Corp

Oct 2020 to Jan 2021

JavaScript Engineer | San Diego, USA, remote

- Worked on an open-source SDK that other teams build their own applications on.
- Built mobile plugins for a content management system in JavaScript and Cordova.

JavaScript, Node.js, Cordova

Abilitiez

Jun 2019 to Oct 2020

Frontend Developer | Amman, Jordan

- Built MVP features for a planned product, from the Figma mockups through to a reusable component set.
- Supported the backend team on REST APIs in Node and Express against MySQL.

React, TypeScript, Node.js, MySQL, Sequelize

SKILLS

Languages	TypeScript, JavaScript, HTML, CSS, SQL
Frontend	Sass, Tailwind, styled-components, React, Next.js, Angular, Vue, RxJS, Redux, NgRx, Ionic, React Native
Design systems	Storybook, Design tokens, Component libraries, Figma, Accessibility, Responsive design, Theming and white-label
Backend	Node.js, Express, REST, GraphQL, PostgreSQL, MySQL, MongoDB, Prisma, Sequelize, Redis, WebSockets
Architecture	Modular monolith, Microservices, Multi-tenancy, Authentication and authorisation, Caching, Queues and background jobs, Server-side rendering
Delivery	Git, GitHub Actions, GitLab CI, Docker, AWS, Vercel, Jest, Cypress, Code review, Agile and Scrum

EDUCATION

BSc Computer Engineering

Sep 2016 to Sep 2021

Al-Balqa Applied University, Faculty of Engineering Technology | Amman, Jordan

LANGUAGES

Arabic, native. English, full professional proficiency.
